Dear Participants:

The Benefits Review and Appeal Board (BRAB), along with the actuary for the plans, monitor the financial health of the APA plans, at multiple times throughout the year to ensure the funding for each plan is adequate and a sufficient reserve is maintained.

Enclosed is the Summary Annual Report (SAR) for the various APA benefit plans. Keeping in mind that the SAR is a very brief regulatory required summary of the financial status of each of the plans in a format required by the government. Over the past several years, the BRAB received questions regarding the value of plan assets for the Pilot Mutual Aid Plan (PMA), and we wanted to provide you with some additional information that is used by the BRAB in monitoring the PMA and determining its future financial needs. The chart below shows the different ways PMA was valued as of December 31, 2024:

<b>Cash Valuation</b> (Master Trust)	<b>Accountant Valuation</b> (As reported by Plan Auditors)	<b>5500 Reported Valuation</b> (As reported by Tax Preparers)
\$3,668,852	\$3,104,416	(\$2,447,584)

The Cash Valuation column represents PMA's assets on December 31, 2024, without deduction for any liabilities. The Accountant Valuation column represents PMA's assets on December 31, 2024, minus known and estimated future liabilities as of December 31, 2024. The 5500 Reported Valuation number is essentially looking at what assets PMA would have remaining if it terminated on December 31, 2024 and paid all known and estimated future liabilities accrued on or before December 31, 2024. None of the columns take into account future contributions or changes in the contribution rates.
